Click the "Calendar" icon on the right top corner , then choose the date to playback the vicoes from cloud storage.

Choose the desired date to check all videos from the cloud.
7. SPECIAL NOTES!

(1.) The device is equipped with a rechargeable lithium battery. The battery life will be affected by the device wake-up time and the number of wake-ups.
Therefore, the PIR sensor alarm detection function is used in an environment with a lot of people. It is recommended to turn off or set the device to low sensitivity to reduce device wake-up and call times extend battery life.
When the battery is low, please charge the battery immediately.

(2.) Keep the device in range of your router.
Make sure the device is placed close to the Wi-Fi router. If there has to be thick or insulated objects between the device and the
Wi-Fi router, which may lead to weak Wi-Fi signal, please make sure the Wi-Fi signal is in good level before you start using the device.

(3.) It is a delicated device with low power consumption design . Everytime the device is awakened and will work for few seconds.
After that, the device will enter standy mode to save power. You can set the work time in the app settings.

(4.) Because the mainland China does not receive Google's system push messages, you need to open the app's self-starting function in your phone to receive push messages.

(5.) This device provides one month of free cloud storage and face recognition services. If you need to continue using value-added services after the trial period e xpires, you need to purchase them in the app.
